UNITED STATES DEPARTMENT OF AGRICULTURE
BUREAU OF AGRICULTURAL ECONOMICS
WASHINGTON, D. C.

February 21, 1947

MONTHLY EGG PRODUCTION, 1945-46

Egg production in the United States in 1946 was 4,634 million dozen, about the same as in 1945, the Bureau of Agricultural Economics announced today. The rate of egg production per layer on hand during the year was about 3 percent higher than the 1945 rate, offsetting a 3 percent reduction in the average number of layers on hand.

Small increases in egg production in the North Atlantic and West North Central States offset decreases in the South Atlantic and South Central States. Production in the East North Central and Western States was about the same in both years.

Revised estimates of layers on farms, rate of lay and total egg production by States, for the years 1940-44 comparable with the estimates in this report will be released later.
